# INFLA TABLE AWN INGS

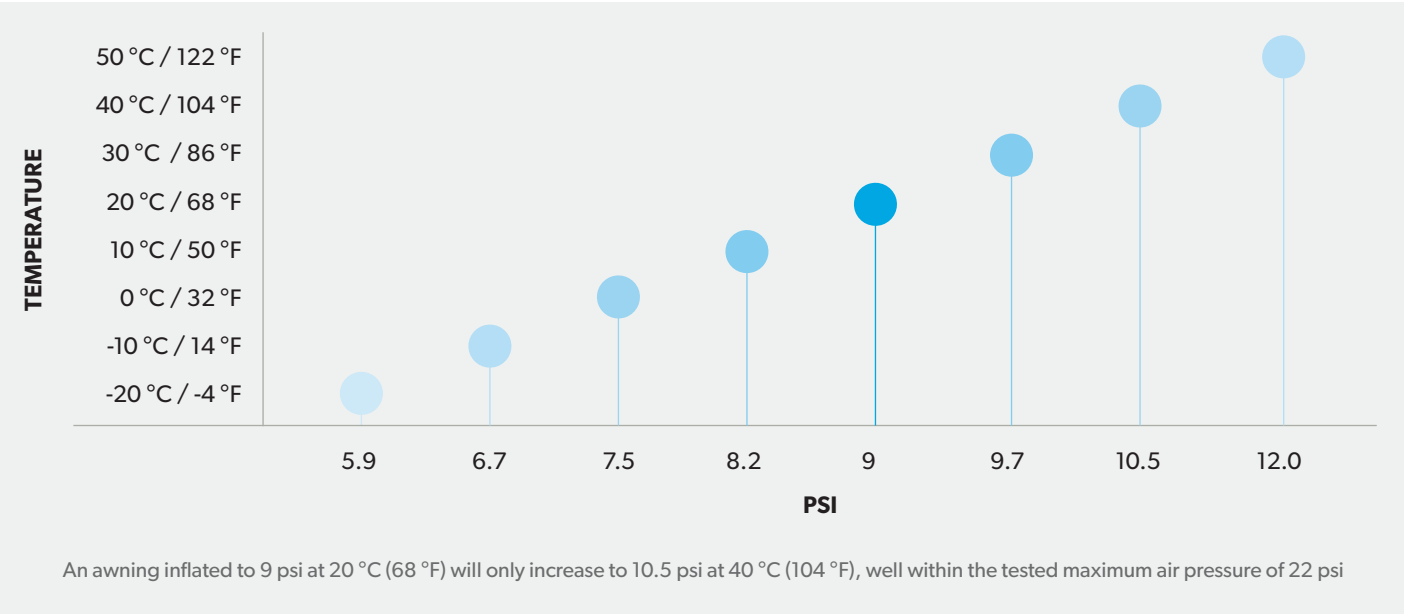

# DOMETIC INFLATABLE AWNINGS

QUICK AND SECURE – OUR INNOVATIVE AIR FRAME HAS REVOLUTIONISED TOURING

The patented AIR Frame technology in Dometic inflatable awnings will transform your touring experience. Conventional steel and fibreglass awning poles are replaced with interlinked inflatable AIR Poles, enabling you to inflate the entire awning from a single external point. Conveniently, the AIR Frame is always attached to the awning for a quick and easy setup. And not only is the AIR Frame extremely strong, it can flex in the wind too, so you'll never

break or bend a pole. Plus, with no metal or fibreglass poles there's nothing to damage your caravan, as the AIR Poles simply rest against your vehicle with no other attachment needed. For optimal awning performance inflate the awning to 9 psi. Each awning comes with a Downdraught hand pump and for maximum convenience, simply plug in the optional Gale 12 V pump.

## AIR FRAME PRESSURE IN RESPONSE TO DIFFERING AIR TEMPERATURES

## SINGLE POINT INFLATION

Individual AIR Poles are linked together allowing the entire awning to be inflated from a single external inflation point. The entire AIR Frame is easily deflated through quick release deflation valves at the base of each leg; as each AIR Pole is connected there is no need to deflate each AIR Pole individually. So, as well as being the easiest awnings to set-up, the user-friendly Dometic awnings are also the easiest to take down.

Deflation valve

For optimal performance inflate to 9 PSI

Inflation valve

## AIR FRAME CONSTRUCTION

The AIR Frame is incredibly durable, each AIR Pole is made of a strong TPU inflation tube zipped into a reinforced laminated oxford polyester/PE cover, which is then zipped into a heavy-duty polyester sleeve in the awning. Tested to 22 psi, the AIR Frame system best functions when inflated to 9 psi.

## RELIABLE TECHNOLOGY

Dometic AIR Poles are well protected and require no maintenance. Inflatable awnings are considerably lighter, and with no poles to snap, the AIR Frame is also far more durable than conventional poles. The AIR Frame is suitable for both hot and cold climates as well as extreme changes in temperature.

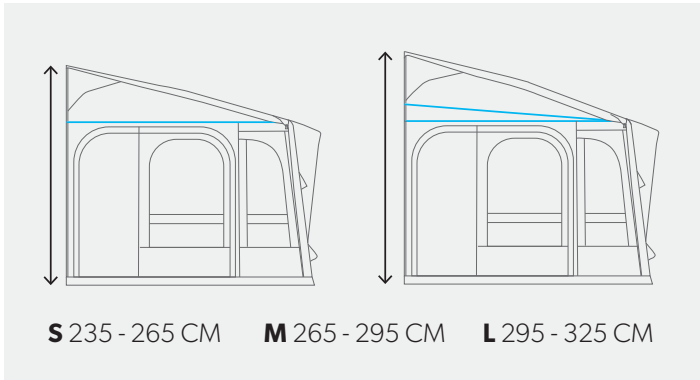

# NEW FEATURES FOR 2021

## MULTI HEIGHT SYSTEM Patent Pending

### DOMETIC HEIGHT ADJUSTABLE AWNINGS ENSURE EXCEPTIONAL VEHICLE FITMENT

Our new Multi-Height System delivers the most versatile inflatable awnings ever. Rather than strictly being suited to either a caravan or motorhome, this ground-breaking feature enables the same awning to fit to a variety of leisure vehicles, with the keder connection now achieved at a multitude of heights within an expanded range.

We know that real-world experience is everything, and thanks to our latest awning innovation these are our best performing awnings ever too. The Multi-Height System means your Dometic awning will be easier to pitch on uneven ground and perform better in adverse conditions, effectively shedding rainwater and fitting closer to the vehicle side.

### HOW DOES IT WORK?

The operation couldn't be easier; simply unzip the gusseted awnings side panels, peg the awning down to fine tune fitment, then close the internal zips to hide any excess material. Once you've set the Multi-Height System for the first time, you are free to set the awning down and pitch again and again without needing to re-adjust. For convenience, the adjustable zipped gussets are positioned just above the zip-out side panels, meaning fitting and adjusting the awning to your caravan can be achieved without the need for a step or ladder.

### DESIGNED FOR TOURING CONFIDENCE

As all experienced caravanners know, selecting the correct size awning for your vehicle is essential to maximise the living space of your pitch and enhance your holiday. The Multi-Height System makes finding your perfect awning easier than ever before, size S awnings connect to vehicles with a connection height range of 235 – 265 cm, size M from 265 – 295 cm and size L from 295 – 325 cm.

## DUAL KEDER

Fitted to all new Dometic inflatable caravan awnings, premium dual awning keder. For 2021, 5.5 mm and 7 mm keder has been installed as standard, allowing a seamless connection to both conventional caravan awning rail and motorhome cassette awnings. This innovative design feature means Dometic inflatable static awnings are equally suited for use with caravans, motorhomes and panel vans. Dual keder reduces model complexity and affords you the freedom to change vehicles without necessarily changing awning.

## APEX VENTILATION

Experience greater comfort with our new weather protected apex ventilation. Fitted to all new Dometic inflatable caravan awnings, triangular apex ventilation panels increase air circulation and improve comfort inside the awning. These auxiliary ventilation points, found in the top corners of each inflatable awning, conveniently allow air to escape the awning as it rises and warms. Importantly, this feature helps to regulate the interior temperature in hotter climates and effectively combats condensation for early and late-season tourers.

# AWNING KEY FEATURES

INNOVATIVE FEATURES TO ENHANCE YOUR TOURING EXPERIENCE

## AIR FRAME™

Single Point Inflation AIR Frame awnings inflate entirely from just one external inflation point, creating an exceptionally strong structure.

## QUICKPITCH™ GUYING SYSTEM

Heavy-duty straps can be pegged out in seconds. Peg the bottom strap taut and adjust the top buckle to apply tension.

## DUAL-PITCH™ ROOF SYSTEM

Effectively deflect wind and shed rain water efficiently to prevent puddling on the roof and enhance performance.

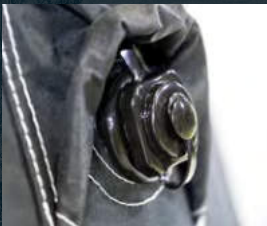

## SABRELINK™ READY

Attach up to three lights on the front and centre AIR Poles. Switch the lights on/off and adjust the brightness remotely. Also suits poled awnings.

## LIMPET™ READY

Pre-punched holes ready to attach the rear wall of the awning to the vehicle using Limpet Fix technology.

# AWNING MATERIALS

HIGH QUALITY FABRICS TESTED FOR DURABILITY

**WATERPROOF**  
Tested to 200L/m<sup>2</sup> per hour to ensure that you are kept dry.

## WEATHERSHIELD™ ALL-SEASON

Ultra-rugged and UV resistant All-Season material, perfect for touring in warmer climates and for use on a seasonal pitch. The fully breathable fabric is constructed to handle extremes of weather and has been tested in the wettest regions of Europe and the sunniest parts of Australia to ensure it never lets you down.

## WEATHERSHIELD™ PRO

The iconic fabric used extensively throughout the awning range has proven quality in diverse environments. With the look and feel of a traditional fabric, but weighing far less, Weathershield™ Pro continues to be the definitive choice for tourers the world over.

## WEATHERSHIELD™ 150D

Extremely light and easy to handle, Weathershield™ 150D promises super-fast set-up and take-down every time. Highly durable and weather-resistant too, this lightweight material offers great value with no compromises.

## WEATHERSHIELD™ PVC

Constructed with 400g/m<sup>2</sup> PVC, this super tough awning material is waterproof, long-lasting and easy to clean. Developed for winter touring, Weathershield™ PVC is rated to -20 °C, more than a match for even the most extreme snowy conditions.

An Ultraviolet Protection Factor (UPF) denotes how much solar ultraviolet radiation is reduced when passing through fabric. Dometic awning material allows only 1/50th of ultraviolet rays to pass through, ensuring you're protected and kept cool.

NEW

Adjustable height

Suitable for vehicles with a rail height of 235 - 265 cm

# ACE AIR PRO

PERFECT FROM EVERY ANGLE

**INTEGRAL INFLATABLE CANOPY**  
Integral inflatable wet weather canopy with apex mesh ventilation
