DOMETIC INFLATABLE AWNINGS

Quick and secure – our innovative air frame has revolutionised touring

The patented AIR Frame technology in Dometic inflatable awnings will transform your touring experience. Conventional steel and fibreglass awning poles are replaced with interlinked inflatable AIR Poles, enabling you to inflate the entire awning from a single external point. Conveniently, the AIR Frame is always attached to the awning for a quick and easy setup. Not only is the AIR Frame extremely strong, it can flex in the wind too, so you'll never break or bend a pole.

Additionally, with no metal or fibreglass poles there's nothing to damage your caravan, as the AIR Poles simply rest against your vehicle with no other attachment needed. For optimal awning performance inflate the awning to 9 psi. Each awning comes with a Downdraught hand pump and for maximum convenience, simply plug in the optional Gale 12 V pump.

Air frame pressure in response to differing air temperatures

SINGLE POINT INFLATION

Individual AIR Poles are linked together allowing the entire awning to be inflated from a single external inflation point. The entire AIR Frame is easily deflated through quick release deflation valves at the base of each leg; as each AIR Pole is connected there is no need to deflate each AIR Pole individually. So, as well as being the easiest awnings to set-up, the user-friendly Dometic awnings are also the easiest to take down.

Deflation valve

For optimal performance inflate to 9 psi

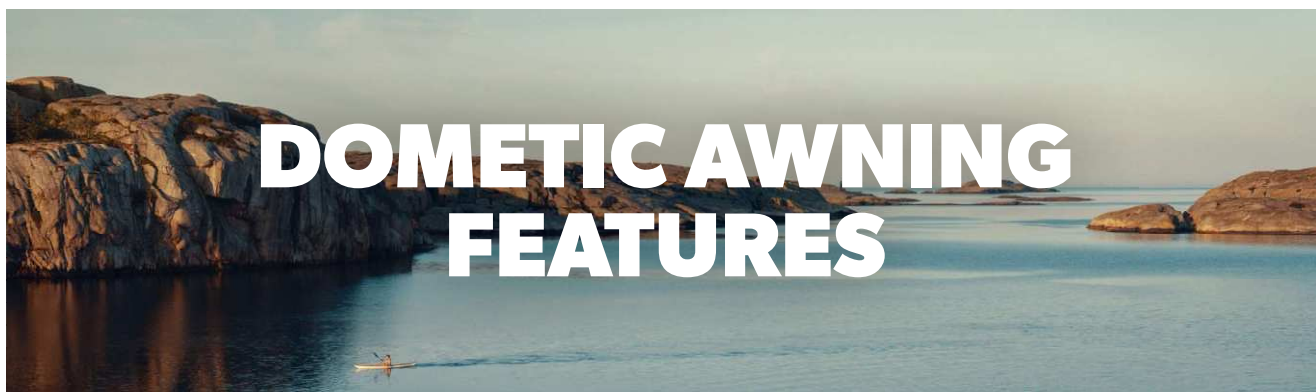

Air Frame Construction

The AIR Frame is incredibly durable, each AIR Pole is made of a strong TPU inflation tube zipped into a reinforced laminated oxford polyester/PE cover, which is then zipped into a heavy-duty polyester sleeve in the awning. Tested up to 22 psi, the AIR Frame system best functions when inflated to 9 psi.

Reliable Technology

Dometic AIR Poles are well protected and require no maintenance. Inflatable awnings are considerably lighter, and with no poles to snap, the AIR Frame is also far more durable than conventional poles. Suitable for both hot and cold climates, the AIR Frame can even handle extreme changes in temperature.

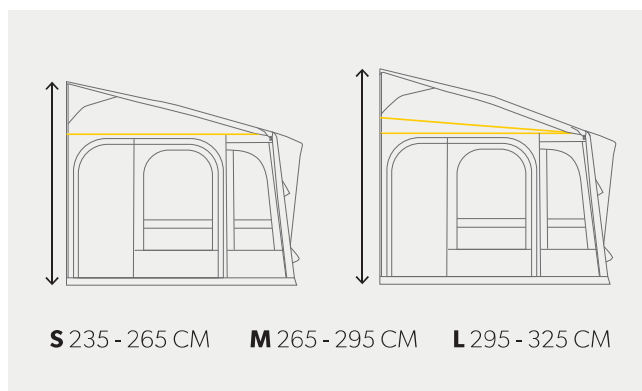

MULTI HEIGHT SYSTEM

Patent Pending

Dometic height adjustable static awnings ensure exceptional vehicle fitment

Our new Multi-Height System delivers the most versatile inflatable static awnings ever. Rather than strictly being suited to either a caravan or motorhome, this ground-breaking feature enables the same awning to fit to a variety of leisure vehicles, with the keder connection now achieved at a multitude of heights within an expanded range.

We know that real-world experience is everything, and thanks to our latest awning innovation these are our best performing awnings ever. The Multi-Height System means your Dometic awning will be easier to pitch on uneven ground and perform better in adverse conditions, effectively shedding rainwater and fitting closer to the vehicle side.

How does it work?

The operation couldn't be easier; simply unzip the gusseted awning side panels, peg the awning down to fine tune fitment, then close the internal zips to hide any excess material. Once you've set the Multi-Height System for the first time, you are free to set the awning down and pitch again and again without needing to re-adjust. For convenience, the adjustable zipped gussets are positioned just above the zip-out side panels, meaning fitting and adjusting the awning to your motorhome can be achieved without the need for a step or ladder.

Designed for touring confidence

As all experienced tourers know, selecting the correct size awning for your vehicle is essential to maximise the living space of your pitch and enhance your holiday. The Multi-Height System makes finding your perfect awning easier than ever before, size S awnings connect to vehicles with a connection height range of 235 – 265 cm, size M from 265 – 295 cm and size L from 295 – 325 cm.

DUAL KEDER

Fitted to all new Dometic inflatable motorhome awnings, premium dual awning keder. For 2021, 5 mm and 7 mm keder has been installed as standard, allowing a seamless connection to both conventional caravan awning rail and motorhome cassette awnings. This innovative design feature means Dometic inflatable static awnings are equally suited for use with caravans, motorhomes and panel vans. Dual keder reduces model complexity and affords you the freedom to change vehicles without necessarily changing awning.

APEX VENTILATION

Experience greater comfort with our new weather protected apex ventilation. Fitted to all new Dometic inflatable motorhome awnings, triangular apex ventilation panels increase air circulation and improve comfort inside the awning. These auxiliary ventilation points, found in the top corners of each inflatable awning, conveniently allow air to escape the awning as it rises and warms. Importantly, this feature helps to regulate the interior temperature in hotter climates and effectively combats condensation for early and late-season tourists.

AWNING KEY FEATURES

Innovative features to enhance your touring experience

AIR Frame™

Single Point Inflation AIR Frame awnings inflate entirely from just one external inflation point, creating an exceptionally strong structure.

Multi-Height System

Your Dometic awning will be easier to pitch on uneven ground and perform better in adverse conditions, effectively shedding rainwater and fitting closer to the vehicle side.

Quickpitch™ Guying System

Heavy-duty straps can be pegged out in seconds. Peg the bottom strap taut and adjust the top buckle to apply tension.

Dual-Pitch™ Roof System

Effectively deflect wind and shed rain water efficiently to prevent puddling on the roof and enhance performance.

SabreLink™ ready

Attach up to three lights on the front and centre AIR Poles. Switch the lights on/off and adjust the brightness remotely. Also suits poled awnings.

Limpet® ready

Pre-punched holes ready to attach the rear wall of the awning to the vehicle using Limpet Fix technology.

Weathershield™ All-Season

Ultra-rugged and UV resistant All-Season material, perfect for touring in warmer climes and for use on a seasonal pitch. The fully breathable fabric is constructed to handle extremes of weather and has been tested in the wettest regions of Europe and the sunniest parts of Australia to ensure it never lets you down.

Weathershield™ Pro

The iconic fabric used extensively throughout the awning range has proven quality in diverse environments. With the look and feel of a traditional fabric, but weighing far less, Weathershield™ Pro continues to be the definitive choice for tourers the world over.

Weathershield™ 150D

Extremely light and easy to handle, Weathershield™ 150D promises super-fast set-up and take-down every time. Highly durable and weather-resistant too, this lightweight material offers great value with no compromises.

Weathershield™ PVC

Constructed with 400g/m² PVC, this super tough awning material is waterproof, long-lasting and easy to clean. Developed for winter touring, Weathershield™ PVC is rated to -20 °C, more than a match for even the most extreme snowy conditions.

Weathershield™ Redux

Waterproof, lightweight, and environmentally responsible. This material is woven from recycled plastic bottle yarn, providing reliable protection from the elements without compromise.

UV Protection

An Ultraviolet Protection Factor (UPF) denotes how much solar ultraviolet radiation is reduced when passing through fabric. Dometic awning material allows only 1/50th of ultraviolet rays to pass through, ensuring you're protected and kept cool.

Waterproof

Tested to 200L/m² per hour to ensure that you are kept dry.

REDUX AWNINGS

On the move – to a sustainable tomorrow

NEW WEATHERSHIELD REDUX MATERIAL

We love the outdoors. As pioneers in the mobile living arena, we are committed to driving sustainability in our industry. Because we want nature to be a resource for everyone to enjoy and explore. Forever.

The new Weathershield Redux material used on our Redux awnings is an important step towards our collective goals. Plastic waste is a major environmental issue but we can play our part by turning a problem into a solution. The material name, Redux, meaning 'brought back', hints at the responsible construction of our new awnings, tents and

furniture. Weathershield Redux is made from 100% recycled plastic bottles and is Global Recycled Standard certified. This new material is only one of the many ways Dometic is ensuring future sustainability across the whole company, to balance our environmental, economic and social impact.

We're now on the move to a better tomorrow, but we're not there yet.

CARA STATIC A

VAN WNINGS

ACE AIR ALL-SEASON

Year-round adventure

Innovative and versatile, the Dometic Ace AIR All-Season awning combines a spacious interior with an ultra-rugged, waterproof exterior. Featuring our unique multi-height vehicle fitting system

and patented Single Point Inflation AIR Frame, the Dometic Ace AIR All-Season is the center of your outdoor adventures and the perfect addition to your RV.

Integral inflatable canopy

Integral inflatable wet weather canopy with apex mesh ventilation.

Extra depth

Generous 3.25 m depth creates a spacious awning interior.

Multi-Height system

Height adjustable awning technology ensures fitment across multiple vehicle types.

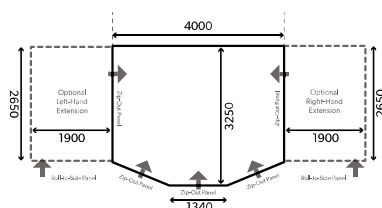

New

Dometic Ace AIR All-Season 400 S

- Width: 4000 mm
- Depth: 3250 mm
- Weight: 33.3 / 9.36 kg
- Min weight: 32 kg

Ref. 9120001964

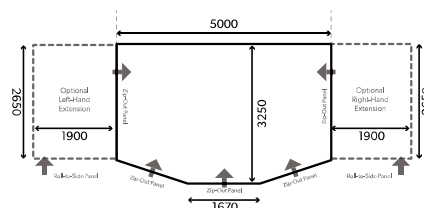

New

Dometic Ace AIR All-Season 500 S

- Width: 5000 mm
- Depth: 3250 mm
- Weight: 37 / 10.7 kg
- Min weight: 35.5 kg

Ref. 9120001965

For full
technical data,
see p. 124

Optional

Ace AIR All-Season Extension

Optional extensions can be fitted to either or both sides of the awning. Simply zip-on and inflate from a single point. Each extension increases the total awning width by 1.9 m whilst maintaining the awning's generous height and depth. Toggle-in the optional inner tent for an additional sleeping space.

LH Extension S / Ref. 9120001143 • RH Extension S / Ref. 9120001144
For further details, see p. 88

Ace AIR All-Season Side Wing*

Zip-on to create shade, shelter and a social space to prepare meals. In less favourable conditions, the Side Wing provides covered access to your awning.

LH S / Ref. 9120001159 • RH S / Ref. 9120001160

RALLY PRO

Fully adjustable for a perfect pitch every time

Ideal for short stays away or for an extended vacation, a comfortable 2.5 m depth ensures there's plenty of room for a

table and chairs. While the Rally's adjustable front poles ensure a perfect pitch every time.

Front upright poles

DynaLite aluminium front upright poles can be adjusted for uneven ground.

Zip-out side panels

Interchangeable zip-out side panels allow the fitting of an annexe and the reversal of the side doors – from the back of the awning to the front.

Roll-to-side front panels

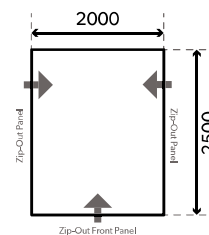

The front panels can be rolled to the side opening the front up, or alternatively zipped halfway down to let air in without compromising security.

DOMETIC
GRANDE AIR PRO
390 XL

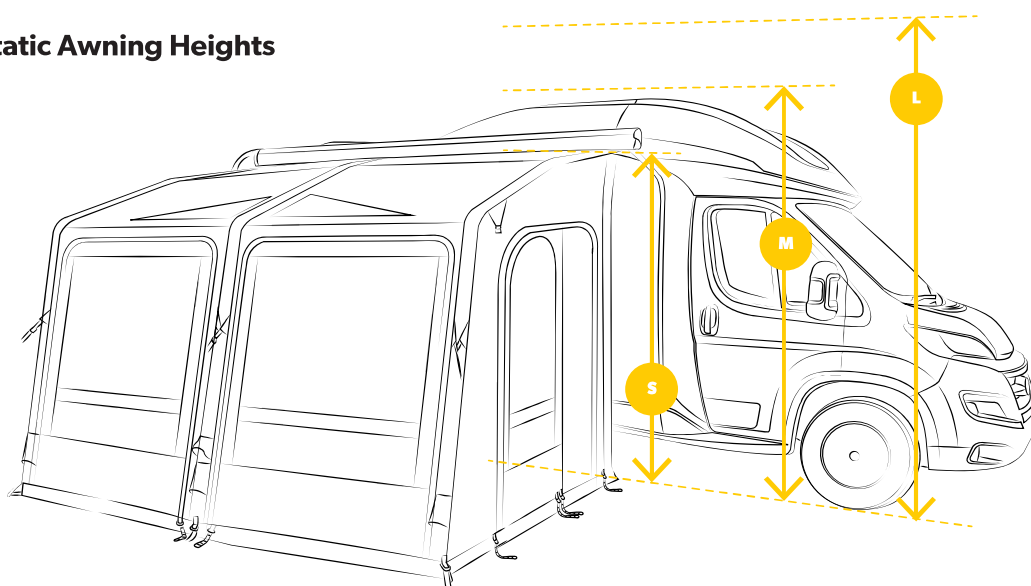

EXPERT ADVICE FROM AWNING PIONEERS

Choose the best inflatable awning for you and your vehicle

It's important to know the height of the attachment point on your vehicle from the ground to determine which awning will best suit your vehicle. For static awnings, this refers to the height from the ground to the awning rail or cassette awning which the awning will be connected to. For drive-away awnings this could also refer to your

vehicle's roof, depending on your preferred fitment method. We offer drive-away and static awnings in a range of heights, designed to fit vehicles with heights of 220 cm up to 325 cm. The diagram below outlines the sizes available for static awnings.

Static Awning Heights

- L** 295 - 325 cm
- m** 265 - 295 cm
- s** 235 - 265 cm

DRIVE-AWAY AWNINGS

Dometic free-standing awnings are available in a range of sizes, built to fit vehicles with a connection height between 220 and 300 cm. Our innovative drive-away awnings are versatile by design, adjustable connection tunnels fit securely to most motorhomes, panel vans and campervans.

STATIC AWNINGS

For tourers wanting an awning designed for static use, our best-selling static awnings are easy to set-up and take-down, providing fantastic fitting to the vehicle side and first class accommodation. Utilising the unique AIR Frame system, which links individual AIR Poles together, Dometic static awnings can be conveniently inflated from a single point. Twin beading comes as standard (5 mm and 7 mm) and can either be fed through the awning rail attached to your vehicle or threaded through the front channel of a cassette awning.

/ Rally AIR

DRIVE AWN

AWAY INGS

DRIVE-AWAY ATTACHMENT OPTIONS

Dometic awnings are available in a range of heights, designed to fit vehicles from 220 to 300 cm in height. Specifically designed for secure attachment to most motorhomes, maximise your awnings performance and your enjoyment of it.

So which best suits you and your van? Let's look at the options: guy line, velcro loops and beading attachment methods are explained below.

Guy Line Straps

The quickest method. Throw the guy lines, attached to the top corners of the tunnel, over the vehicle and either peg down on the other side or tie to the wheels. To drive-away, simply untie/unpeg and throw them back over.

Velcro Loops

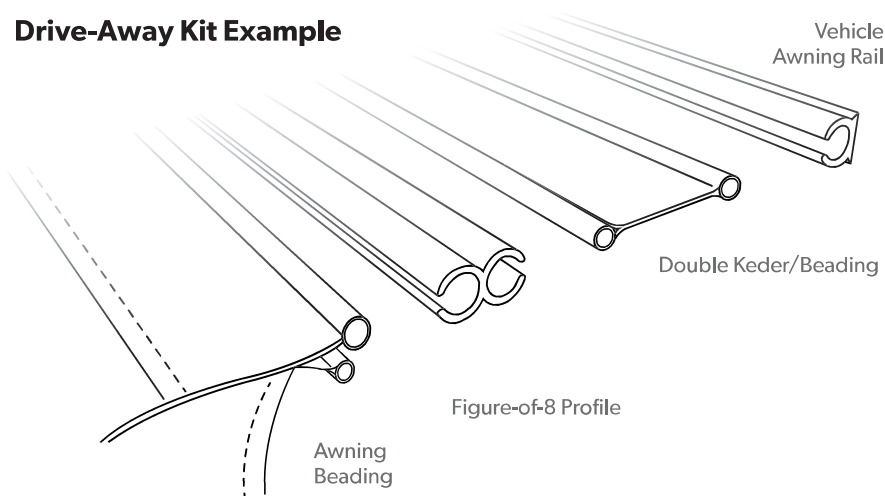

Velcro straps are quick to attach to your vehicle's roof rails, if available. Connected from the top edge of the tunnel to the rail, simply release the hoops and drive away.

Drive-away kits

Drive-away kits offer a secure way to attach your awning to your vehicle. Simply connect the figure-of-8 strip to the keder along one edge before attaching the pre-sewn awning beading along the other. To drive away, slide the figure-of-8 out of position and leave the awning free-standing on your pitch.

Drive-Away Kit Example

Twin drive-away kit keder

Connect to the front channel of cassette awnings or a pre-installed awning rail. 4 mm and 6 mm twin keder drive-away kit. Available in 3 m and 4 m lengths.

Magnetic drive-away kit

6 mm keder to magnetic system. Guying loops included (guy lines not included). 3 m length.

Limpet™ suction drive-away kit

6 mm keder to Limpet™ Fix System. Supplied with six Limpet's. 3 m length.

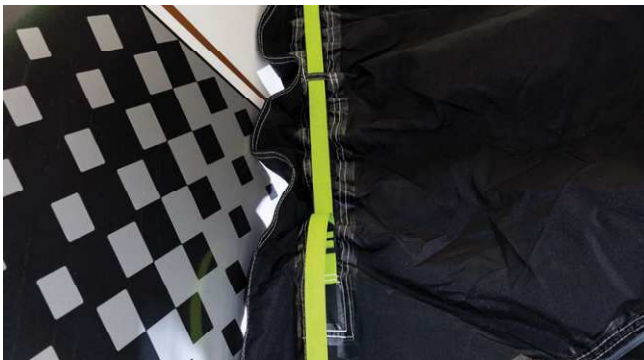

RALLY AIR PRO DA

The ultimate drive-away awning

Designed to suit a wide range of vehicles, the Rally AIR DA allows you to leave your awning on site while you explore the local

area. It's easy to set up too, thanks to the Single Point AIR Frame technology.

Adjustable awning tunnel

Adjustable height rear tunnel to suit a wide range of vehicles. Webbing straps take up material slack to ensure a tight fit to your vehicle.

Single point inflation

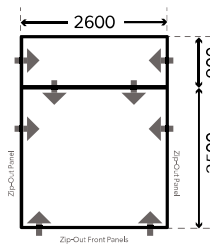

Conveniently inflate the entire AIR Frame from just one external inflation point.

The zip-in waterproof groundsheet can be pegged down for step free access or toggled up to prevent insects accessing the awning.

For full technical data, see p. 140

The innovative Sunshine AIR replaces metal poles with a rigid Air Frame. Relax in comfort from the summer sun or simply attach optional side walls to provide a little privacy and protection from the wind.

Dometic Sunshine AIR Pro VW

- Width: 2400 mm
- Depth: 1950 mm
- Weight: 8.5 kg
- Min weight: 6.22 kg

Ref. 9120000201

Optional

Side wall set

Additional side walls provide shelter from the elements. Side walls clip-on to the adjustable aluminium poles that feature in this set.

Ref. 9120000202

Fitting Height

Campervan:

180 - 210 cm

SUV:

160 - 210 cm

HUB

Inflatable modular shelter

With the HUB, versatility is built in. Whether it's weekends away in the SUV, family vacations in the campervan or quick and convenient shelter from sun in the garden or park, the Dometic HUB has you covered.

Adapt the HUB to suit your needs, start with the base shelter and add an annexe, mesh panels, wall panels and connection tunnels to suit SUVs and campervans. Single point inflation Air Frame technology and QuickPitch straps ensure you are pitched and ready to enjoy the outdoors in no time.

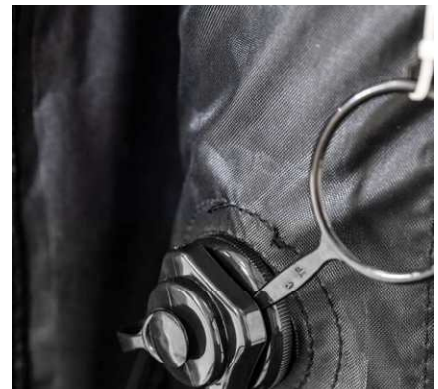

QuickPitch™ guying system

Set-up in seconds. Peg the bottom strap taut and adjust the buckle to apply tension.

Optional zip-in panels

Optional panels can be zipped out to reduce weight and to open the shelter up.

Single point inflation

Single Point Inflation awnings inflate from just one external inflation point.

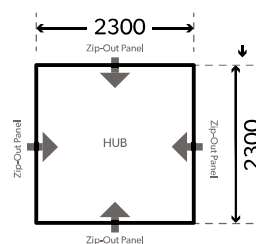

Dometic HUB

- Width: 2300 mm
- Depth: 2300 mm
- Height: 2300 mm
- Weight: 13.8 kg
- Min weight: 12.3 kg

Ref. 9120001506

For full technical data, see p. 141

Optional

HUB Sleeping Annexe

Complete with inner tent. This optional annexe is great for extra guests, pets and storage.

Ref. 9120001507

New

HUB Connector Strip

Seamlessly connect multiple Dometic HUB 1's together with the Dometic HUB Connection Strip. Simply zip on and multiply your liveable pitch space in up to four directions - perfect for hosting friends and family.

Ref. 9120001972

Optional

HUB Connect Tunnel

Optional connection tunnels to fit to SUVs and campervans.

SUV Connect Tunnel

Ref. 9120001510

VW Connect Tunnel

Ref. 9120001511

To view the full range of accessories, see p. 141

HUB 2

Find your freedom

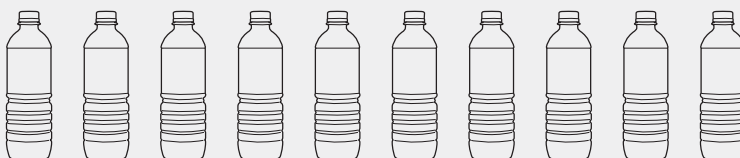

Featuring innovative design and function, the Dometic HUB 2 ensures fast shelter whenever you need it. Our all-new Weathershield™ Redux polyester, woven with recycled plastic bottle yarn, is high-performance and extremely reliable. The HUB 2 utilizes smart

weight saving features and patented AIR Frame technology, forming a compact pack size that's perfect for carrying on your back or throwing in the trunk of your car, ready for your next adventure.

MADE WITH
RECYCLED
MATERIALS

TEN 0.5L PLASTIC BOTTLES = 1 METRE OF REDUX MATERIAL

THE DOMETIC HUB 2 USES APPROXIMATELY 10.5
METRES OF MATERIAL

= 105

THAT MEANS 105 BOTTLES
HAVE BEEN RECYCLED TO
MAKE THIS TENT.

Removable groundsheet

Made from recycled plastic bottles, the HUB 2 toggle-in groundsheet provides comfort and protection from wet or rugged terrain.

Single point inflation

Single Point Inflation awnings inflate from just one external inflation point.

Weathershield™ Redux

Waterproof, lightweight, and environmentally responsible. This material is woven from recycled plastic bottle yarn.

New

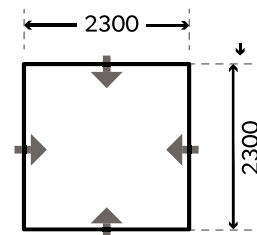

Dometic HUB 2

- Width: 2300 mm
- Depth: 2300 mm
- Height: 2300 mm
- Weight: 8.94 kg
- Min weight: 8.5 kg

Ref. 9120001968

For full technical data, see p. 141

Optional

HUB Weight Bag

Pitch your Dometic HUB on hard, stony or sandy ground with ease. Fill the Weight Bag with water or sand and secure to your inflatable shelter, allowing you to securely pitch your HUB wherever you are – even when using pegs is not an option.

Ref. 9120001512

Optional

HUB 2 Inner Tent

Easy to install, simply toggle-in this inner tent and create a private sleeping space in your Dometic HUB 2. Made from breathable cotton fabric for added comfort and a zipped door for convenience.

Ref. 9120001983

Optional

HUB 2 Mesh Panel

Enhance the comfort of your outdoor experience. Keep unwanted insects away and add shade with the Dometic Mesh Panel.

Dometic AIR Break Door

Provide easy access to your pitch with the Dometic AIR Break Door. Simply zip-on aside your AIR Break and conveniently close off your pitch, adding privacy and keeping pets in. The inflatable door panels meet magnetically and can be pegged down too for additional security in windy conditions.

The Pro Windbreak is the perfect addition to make your awning more comfortable. Quick to set-up and supported with adjustable

support bars. Its full aluminium frame is lightweight and corrosion-resistant.

Dometic Pro Windbreak 1
